Treating Type 2 Diabetes in 2018: A Medication Update

Presented by: Timothy W. Bodnar, MD

For MSU-COM Statewide Campus System Family Medicine Educational Day

November 7, 2018

Lecture Objectives:

1. Review available algorithms for medication choice in T2DM
2. Learn key points about newer, less familiar medications
3. Understand the “role” each medication class can play in type 2 diabetes treatment including older, lower-cost medications
4. Choose medications based on various characteristics including weight gain or loss, likelihood of hypoglycemia, cardiovascular and/or renal benefits, route of administration, and cost
