Assistant Professor
University of Michigan School of Medicine
“When Fractures Don’t Heal. Evaluation and Management of Nonunions

3:15pm Discussion

3:30pm Adjournment

This course is a cutting edge interactive program that is organized for the benefit of orthopaedic surgeons, residents and their allied associates focusing on techniques and controversies in orthopaedic surgery. National and state faculty will discuss the latest issues when treating patients with all types of musculoskeletal injuries. The program combines didactic lectures with lively panel discussions.

(CME has been applied for.)
