GOALS AND OBJECTIVES
Workshop participants will explore the critical role of mental health professionals in identifying and treating victims of sexual assault. Participants will gain important knowledge about human trafficking, including recognizing risk factors and understanding legal support services.

Following this workshop, participants will be able to:
1) Identify those at high risk of becoming involved in human sex trafficking
2) Recognize the signs and symptoms of human and sex trafficking victims
3) Understand their reporting responsibilities in suspected sex and labor trafficking.
4) Explain how the police typically investigate complaints of child sexual abuse.
5) Explain the barriers to prosecution of child sexual assault complaints.
6) Explain what happens in cases that are not prosecuted.

ACGME Milestone Sub-Competencies Addressed:

PC1. Psychiatric Evaluation
PC3. Treatment Planning and Management
PC4. & MK4. Psychotherapy
MK2. Psychopathology
MK6. Practice of Psychiatry
SBP3. Community-Based Care
SBP4. Consultation to non-psychiatric medical providers and non-medical systems (e.g., military, schools, businesses, forensic)
PROF1.1 Compassion, integrity, respect for others, sensitivity to diverse patient populations2, 3, adherence to ethical principles

AGENDA
This conference is a day-long session consisting of lectures from a variety of professionals including physicians, social workers, legal experts, and law enforcement. Topics include:

- Recognition of Human Trafficking by Mental Health Professionals
- Survivor Perspective: Experience of a Person who was Sex Trafficked/Victimized
- Judicial Recognition of Sexual Victimization
- The Victim’s Experience During the Investigation and prosecution
- Prosecution of CSC/SVU/ICPO Experience
- Child Pornography

ASSESSMENT
Workshop participants will take a post-test to evaluate knowledge and ability to apply key concepts from the lectures.
