Speaker Bio: Dr. Rick Bennett is Associate Professor of Urology at Michigan State University and Oakland University William Beaumont School of Medicine. He is also the Director of urologic robotic surgery at McLaren Oakland Hospital. Dr. Bennett graduated from Wayne State University Medical School in 2002 and completed his General Surgery Internship and Urology Residency at William Beaumont Hospital. Finally, he received his Fellowship training in Male Infertility, Microsurgery, Andrology, and Erectile Dysfunction in 2009 from Baylor College of Medicine.

Goals:
Understand the likely causes of PD
Know the AUA guidelines on treating PD
Be able to identify candidates for xiaflex treatment and penile implant surgery with modeling.
Know the history, exam and biochemical testing needed to evaluate the patient.
Differentiate obstructive from non-obstructive azospemias.
Know the surgical options for treating of obstructive azospemias.
