Spartan Medical Research Journal Human/Animal Rights Policy

The Spartan Medical Research Journal (SMRJ) approaches manuscripts entailing the use of animals with the utmost seriousness. MSU and the SMRJ Editorial Office believes animals should be used for research and teaching leading to submitted articles only when necessary and always with the most humane treatment, the and oversight.

At MSU, the use of animals in research and teaching is operated in concordance with the MSU Institutional Animal Care and Use Committee (IACUC) in compliance with U.S. Department of Agriculture regulations and the U.S. Public Health Service (PHS) Policy on Humane Care and Use of Laboratory Animals.

It is mandatory for the authors reporting experiments with the involvement of animals and human subjects to adhere to each of the following:

1. The authors should include a statement in the “Methods” section of the article that they have identified the related MSU and healthcare system institutional review board and/or licensing committee and have received full approval from the committee before starting their experiments. They should also describe their adherence to the 2015 U.S. PHS Policy on Humane Care and Use of Laboratory Animals and 2011 National Research Council Guide for the Care and Use of Laboratory Animals to ensure the humane and appropriate use of live vertebrate animals in all forms of medical research.

2. The authors should declare that they have conducted all experiments in accordance with relevant guidelines and regulations of the IRB and licensing committee.

3. If an author performed experimental studies involving client-owned animals, he/she must present an acceptance document from the client to the SMRJ Editorial Office at time of submission about best practices in animal testing.

The Editor-In-Chief will evaluate each submitted manuscripts on animal well-being issues and if the research found to be inconsistent with commonly accepted norms of using the animal and human subjects, the manuscript will be rejected. The Editor-In-Chief also reserves the right to contact the IRB/approving committee for any further clarification.
